FOR DROPSY.
I NEVER SHALL FORGET THE FIRST DOSE.

Mr. H. R. Stevens :

Providence.

Dear Sir-I have been a great sufferer from lropsy. I was confined to my house more than a year. Six months of the time I was entirely helpless. I was obliged to have two men help me in an out of bed. I was swellen 19 inches larger than my natural size around my waist. I suffered all a man could and live. I tried all remedies for Dropsy. I had three different doctors. My friends all expected I would ferent doctors. My friends all expected I would die: many nights I was expected to die before morning. At last Vegetine was sent me by a friend. I never shall forget the first dose. I could realize its good effects from day to day; I was getting better. After I had taken some 5 or 6 botties I could sleep quite well nights. I began to gain now quite fast. After taking some 10 bottles, I could walk from one part of my room to the other. My appetite was good; the dropsy had at this time dissappeared. I kept taking the Vegetine until I regained my usual health. I heard of a great many cures by using Vegetine after I got out and was able to attend to my work. I am a carpenter and builder. I will also say it has cured an aunt of my der. I will also say it has cured an aunt of my wife's of Neuralgia, who had suffered for more than 20 years. She says she has not had any neuralgia for eight months. I have given it to one of my children for Canker Humor. I have no doubt in my mind it will cure any humor; it is a great cleanser of the blood; it is safe to give a child I will recommend it to the world.

My father is 80 years old, and he says there is nothing like it to give strength and life to an aged person. I cannot be too thankful for the

use of it. I am
Very gratefully yours.
JOHN S. NOTTAGE. ALL DISEASES OF THE BLOOD.—If Vegetine will relieve pain; cleanse, purify, and cure such diseases, restoring the patient to perfect health after trying different physicians, many remedies and suffering for years, is it not conclusive proof, if you are a sufferer you can be cured? Why is this medicine performing such great cures? It works in the blood, in the circugreat cures? It works in the blood, in the circulating flu d. It can truly be called the Great Blood Purifier. The great source of disease originates in the blood; and no medicine that does not act directly upon it to purify and renovate, has any just claim upon public atten-

### VEGETINE IOWE MY HEALTH TO YOUR VALU-

ABLE VEGETINE. Newport, Ky., April 29, 1877.

H. R. Stevens, esq Dear Sir—Having suffered from a breaking out of Cankerous Sores for more than five years, caused by an accident of a fractured bone, which fracture ran into a running soro, and nav-ing used everything I could think of and noth-ing helped me until I had taken six bottles of your valuable medicine, which Mr. Miller, the apotheeary, recommended very nighly. The dark szure ot the sky. sixth bottle cured me, and all I can say is, that I owe my health to your valuable Vegetine.

Your most obedient servast.
ALBERT VON ROEDER. 'It is unnecessary for me to enumerate the diseases for which the Vegetine should be used I know of no disease which will not admit of its complaints are caused by poisonous secretions in the blood, which can be entirely expelled from the system by the use of the Vegetine. When the blood is perfectly cleansed the disease rapidly yields; all pains cease; healthy action is

### promptly restored, and the patient is cured." VEGETINE CURED ME WHEN THE DOOTORS

FAILED. Cincinnati, O., April 10, 1877.

Dr. H. R. Stevens : Dear Sir: I was seriously troubled with Kidney Complaint for a long time. I have consulted the best doctors in this city. I have used your Vegetine for this disease, and it has cured me when the doctors failed to do so.
Yours truly, ERNEST DURIGAN,

### Planets in July. The Providence Journal says :- Jupiter will

be a conspicuous object in the eastern sky during the month, rising now about 9 o'clock, and shining with wondrous beauty in the constellation Capricornus. On the 25th this planet comes into opposition with the sun, and will at that time sbine with his greatest brilliancy, for he is at his nearest approach to us, the suo, the earth, and the planet being in a line, with the earth in the centre. He is then more than 180 000,000 of miles nearer than when, in the opposite portion of his orbit, he comes into conjugation with the sun. The opposition of a planet means that its position is opposite to the sus, and that it will rise when the sun sets. Therefore, the sparkling gem that in the latter part of the month will rise above the southeastero horiz to as the sun sinks below the western may be easily recognized as Jupiter. It will be desightful to waten his course, as he rises earlier each evening, increasing all the while in size and brilliancy, until he reaches his opposi-tion on the 25th. Nothing in the eastern heavens will dispute his supromacy until the crescent moon waxes into proportions that overshe has passed her full, on the 15th, she will be in conjunction with the bright evening star, and a charming picture will be painted ou the

Mars is also an evening star, but is of little account, he is so far away and shines with so insignificant a lustre after the glorious display he made last year, when his glowing aspect turned all the world into star gazers. He is passing to his superior conjuction with the sun. use, with good results. Almost innumerable reaching this point on the 18th Sept, when he will be 180,000,000 of miles further from us than at his memorable opposition of 1877, the epoch of the discovery of his two satellites .-Mars may be looked for in the constellation Leo, setting now not far from 9 o'clock, and not very distant from Regulus. On the 221 Mars and Mercury are in conjunction. Os the 29th those who are fortunate enough to witness the total eclipse of the sua will see Mars, Regu lus, and Mercury forming an irregular line .-Mercury being the brightest, and possibly the only one of the starry trio visible during the

short period of total darkness. Saturn, although not classified as an evening star until his opposition on the 221 of Septem ber, rises now not long after 11 o'clock, and at the close of the month may be seen nearly two hours earlier. He is tracking his slow course among the small stars of the constellation Pisces. coming into better position for observation, and may be easily recognized from his superior brightness to the stars in the vicinity, rising also a little south of east.

Venus remains unrivalled among the morn ing stars. She passed her greatest western elongation on the 2d of June, and is now speeding far away from us to her superior con junction on the 5th of December. She rises during the month not very far from 2 o'clock. and early risers commanding a view of the eastero horizon will be well rewarded by the sight of her charming face and the sefe, deli cate coloring that distinguishes the most beau tiful star among the myriads that make up the starry host. Though far away and small in

size, she retains her sovereign sway, and lin gers in the morning sky till the sun is read? to show his face above the horizon. Mercury, in the first part of the month, is too near the sun to be visible, but on the 31st ha does not set till 8:20 o'clock, and may, perhaps be picked up by sharp syes in the evening twi light 7° south of the place of sun set. On the 28:b, Mercury and Uranus are in corjucciou. and both planets are near Regulus, but a good

telescope is needed for a good view of the

celestial phenomenon. The inconstant moon, as usual, playe off her airs and graces to win the f-vor of her brother and sister planets. She glided as a sleuder thread of silver light near the path of Mars on the 2d, will beam with nearly full orbed solen der in conjunction with Jupiter on the 15 h. and pass near Saturn on the 20th, having then nearly reached her last quarter. But she will DER; the perfection of chemistry; the be seen in her most faccinating prase on the strongest and best Baking Powder made; one morning of the 27th, when in waning glory she hange near the bright morning star, while in occ. star and breaking dawn will form a picture of celestial loveliness fair to behold. Thus, with the waxing and waning phases of the July moon, the rising, setting, and conjunction of he planets, the midsummer noctu.nal -ky wat form a succession of pictures of unending varie g, full of beauciful combinations of starry glory, delightful to æstaetic toste, ric', ic arous ing emotions of reverential awe, and fruitful to the beet kind of instruction-that which lifts the soul from the absorbing pursuits of time and sense to the contemplation of it a wonders f immensity. The summer is the best time to study astronomy, and enomer tourists will find no more satisfactory amu ement that that which may be er joyed as tracing the movements and learning the names of the mysterious cwicklers hanging suspended in the depths of space over the mountain tops, or, glistening in the grand ky, reaches that arch over suburban resorts, or

> round 'ue sessbore. THE GREAT SWITE PROCESS FLOUR!
> This Flour is conceded to be the highest standard process made; makes whiter bread and yields a larger baking than any other brand. In barrels, quarter barrels and tacks.
